March 16, 2017

9AM-10AM

Conference Rooms A & B

Understanding Autism Spectrum Disorder (ASD)

Learning Objectives:

1. Provide a review of ASD diagnostic criteria and changes as a result of DSM-5.
2. A brief historic timeline of the disorder will be presented, including evolution of the disorder.
3. Risk factors and prevalence rates in ASD will be discussed.
4. A discussion of co-morbid conditions, including ADHD, and differentially diagnosing personality disorders will take place.
5. Treatment implications and pertinent clinical cases will be highlighted.
