

Understanding and Treating ADHD: What it is and how you can most effectively help your child

CBC invites you to a **free** lecture for **parents of children, adolescents and adults with attention deficit/hyperactivity disorder**, provided by an expert neuropsychologist in the field!

On Monday October 20th, we have invited Dr. Sejal Vyas to present information on the neurobiology of ADHD /executive functioning, co-occurring problems and symptoms, and how to best treat these issues. The talk will include information on medication interventions, research-based therapy interventions, as well as resources for effectively managing your child or adolescent's symptoms. In addition, information on the potential benefits of neuropsychological assessment and ways that this can support your child will be explored.

Dr. Vyas is a pediatric and adult neuropsychologist who specializes in the neuropsychological evaluation and learning consultation of children, adolescents, and adults. Her areas of specialization include neuro-developmental syndromes such as ADHD, Concussions, autism spectrum disorders, epilepsy, as well as other neuropsychiatric conditions.

Date: Monday October 20th

Time: 7:00 – 8:30 pm

Interested? Please contact Dr. Courtney Berry **at 914-385-1150** (ext. 25) with any questions, or to sign up to attend the talk. **Seating is limited so call soon!!** There is **NO charge** for this lecture.
