

## **Demystifying Executive Functioning with Dr. Sejal K. Vyas, PH.D**

Does your child have difficulty staying organized, planning ahead, prioritizing, paying attention to details, or has difficulty keeping up? There may be underlying circumstances which cause these challenges for your student despite their efforts to hold it all together at school. An understanding of Executive Functioning and how to help students who experience these symptoms will be addressed.

We are excited to partner with Dr. Sejal K. Vyas, a pediatric and adult Neuropsychologist. Dr. Vyas has over 15 years experience, worked with many students at hospitals in NY, CT and CA. She has also worked in the Diagnostic Clinic at the Eagle Hill School in Greenwich, as well as held a number of leadership positions at other associations. She currently practices in New York City, Greenwich and Stamford, CT. Please join us for this informative talk.

When: March 5th, 2015 at 9:00am  
Where: 19 East Elm Street, 3rd floor
